Business Case:

HungryTummies is an app that lets a person buy and sell home-cooked food. The person who cooks has the flexibility to cook when convenient. All order payments go through HungryTummies, not the cook.

The person selling the food doesn't have to own a restaurant, can cook at flexible schedules and cook and sell the food for as less as one person. They may choose to cook regularly.

❖ Customer

To become a HungryTummies customer, a user must set up an account by downloading the Hungry Tummies app to their mobile device and creating a profile, entering limited contact and payment information. The user can look at the posted menu by food categories, by chefs and availability (time and quantity). The person can then place an order by mentioning the order details and if needed, can further choose to contact the chef through a chat option. The user can either pick-up their order or request to get it delivered. The user can also rate and review the chefs and menu.

❖ Chef

To be able to sell their food through HungryTummies, a user must set up an account online by creating a profile. The person must be legally authorized to work. The user should comply with certain hygiene standards. Additionally, each applicant must successfully pass a background check. Chefs serve as independent contractors. The user may cook at regular basis. The user post details such as the menu they are cooking, description and category of the menu, maximum number of people they can cook for(optional). Upon request from the customer, this can be modified.

Benifits

- Availability of variety of menu at lower cost.
- Delivery of home-cooked food at regular basis, upon request
- Earn in free-time as well.

User Personas:

Marcelo Sonkar

Role: Admin

Goals:

View and approve chef registrations

- Provide technical support to the user
- Maintain users
- Post and update general information

Tony Jadhav

Role: Home cook / chef

Goal:

Upload menus and take in orders

Woaks Kashyap

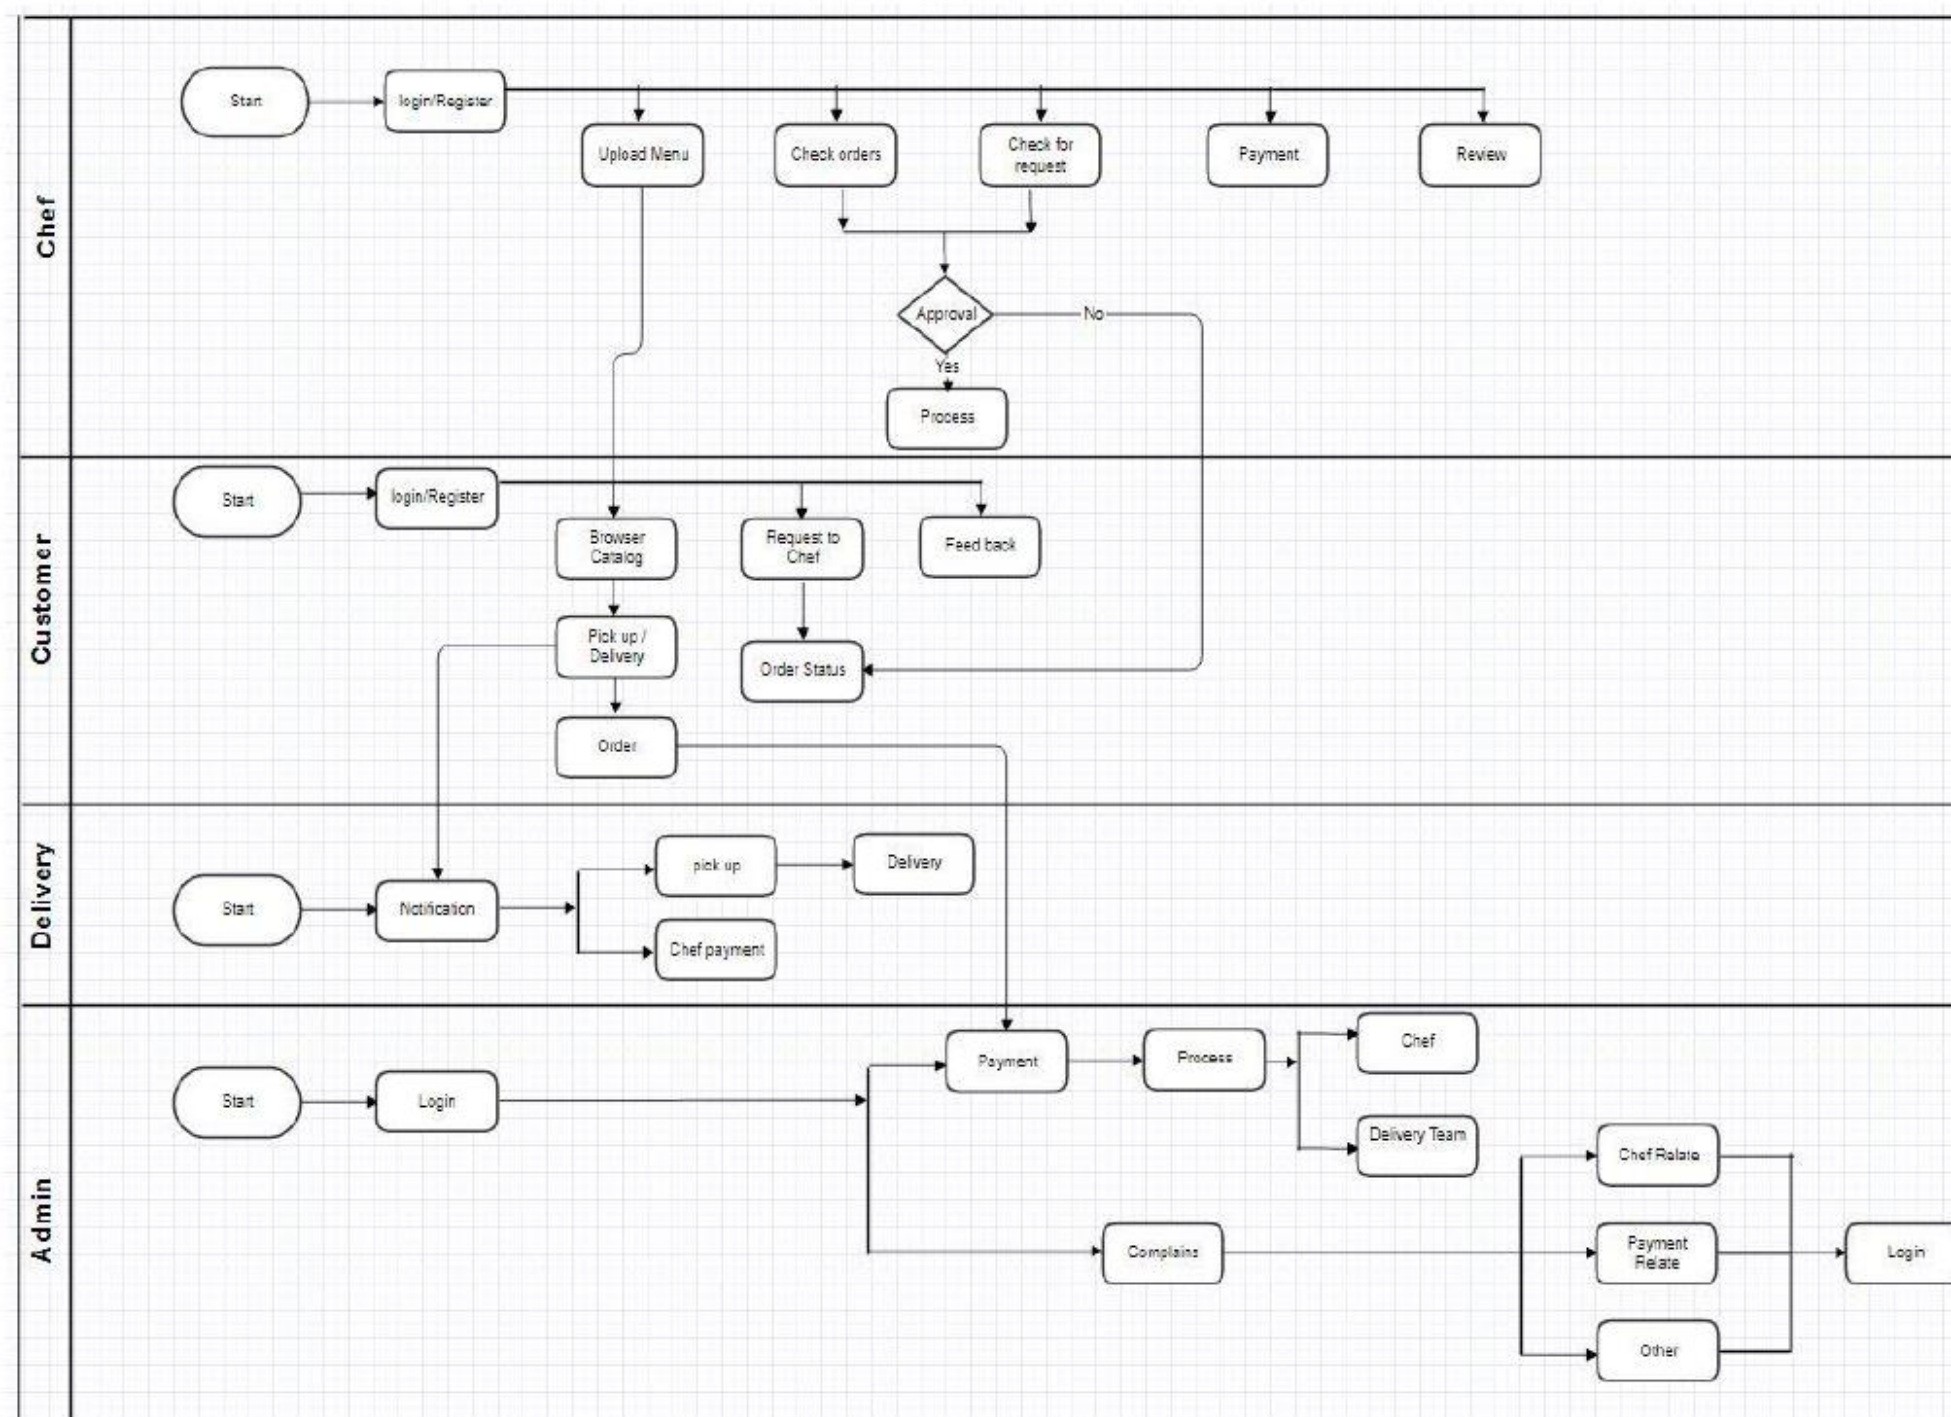

Role: Customer

Goals:

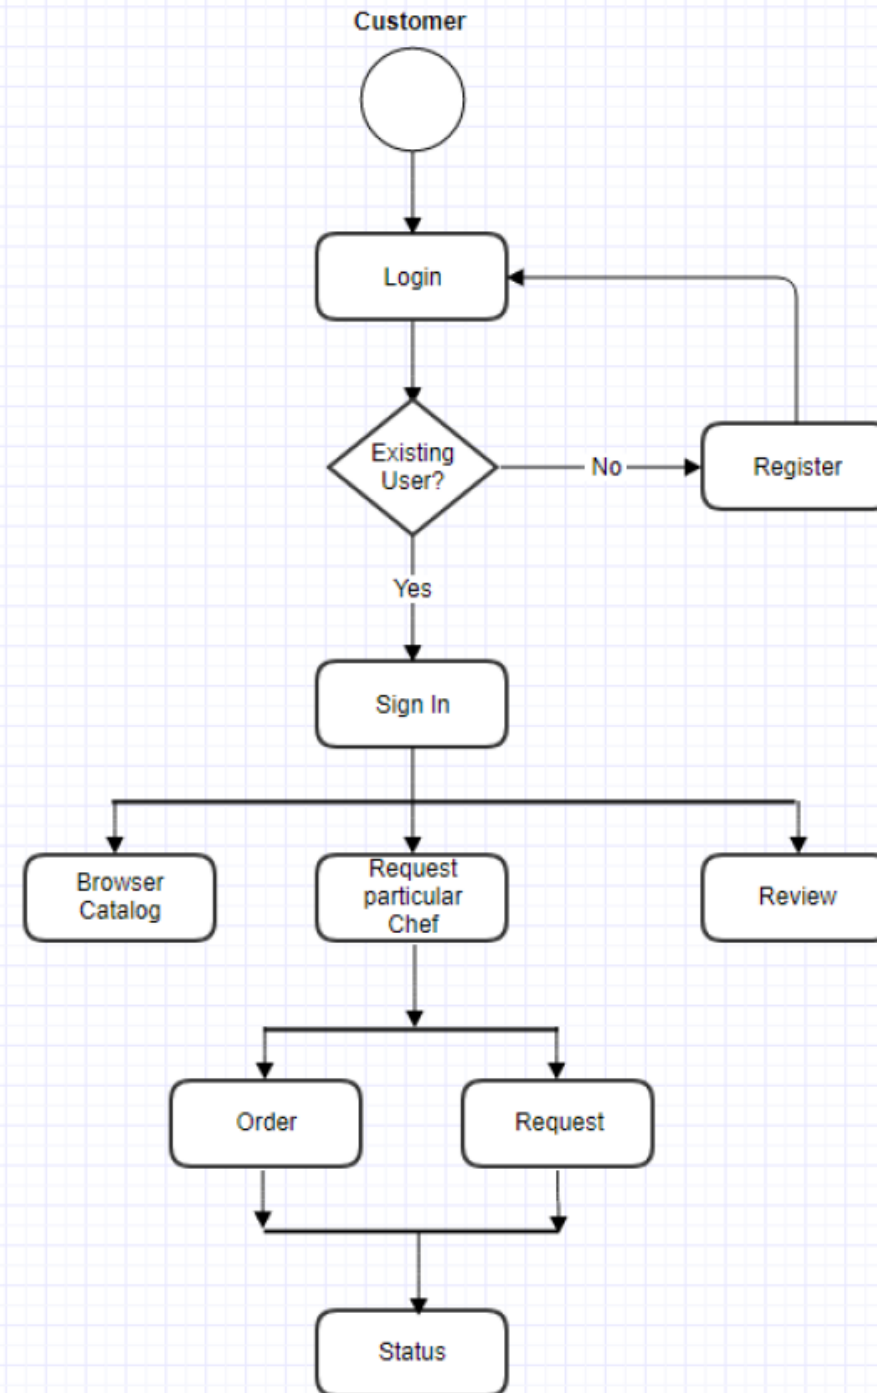

Place order for food

Review or rate dishes and chefs
